

ENTERPRISE APPLICATION SUITE BY CLL SYSTEMS

Intelligent applications built around **the way your organization operates.**

CONFIGURABLE | INTEGRATION-READY | CLOUD OR ON-PREMISE | **LOCALLY DELIVERED**

AssetCentinals™

Asset Tracking Management for
IT and Non-IT Assets

Know your assets – seen,
secured, accounted for.

VisionAICentinals™

AI Video Intelligence &
Operational Response

Turn video into intelligence and
action.

Centinals™ — Enterprise Applications by CLL Systems

Tell us the challenge. We'll show you what Centinals™ can do.

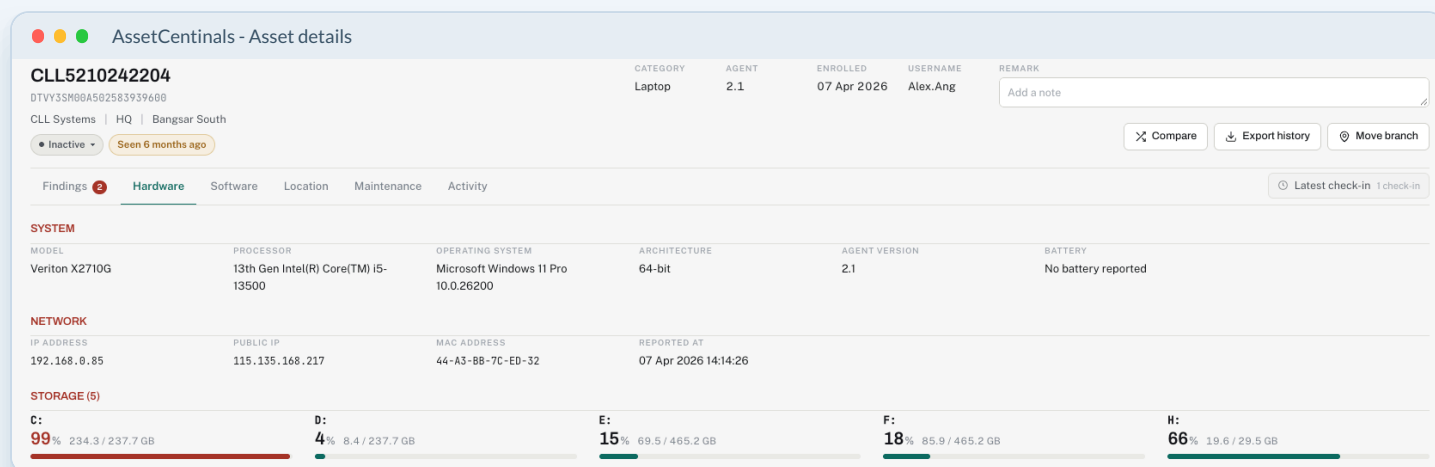

AssetCentinals™

Asset Tracking Management

Know your assets and secure your endpoint.

One platform to manage what you have, where it is, who has it and what happens next.

AssetCentinals™ brings asset records, movement, custody and condition together — giving organizations better visibility and control.

WHY IT MATTERS

TODAY'S CHALLENGE	WITH ASSETCENTINALS™
Fragmented asset records	→ Centralized visibility
Manual tracking and audits	→ Digital workflows
Unclear ownership and custody	→ Assignment & movement tracking
Limited lifecycle visibility	→ Complete asset history
Time-consuming reporting	→ Dashboards & analytics

KEY CAPABILITIES

REGISTER	TRACK	VERIFY	MAINTAIN	ANALYZE
● Identification — QR / Barcode / NFC / RFID / OS Agent ● Hardware & software inventory — IP, MAC, RAM, disk utilization, installed software ● Maintenance & inspection ● Dashboards & reporting			● Asset assignment & movement ● Location & custody ● Alerts & approvals	

BUILT AROUND YOUR OPERATION	Configurable Adapt asset types, workflows, approval processes and reporting to your organization's requirements.	Integration-ready Designed to work with existing systems and data where required.	Cloud or on-premise Deploy according to your organization's technology and security requirements.
------------------------------------	--	---	---

IDEAL FOR Government Enterprise Education Healthcare Facilities Distributed Operations

THE RESULT

Better visibility. Greater accountability. Smarter lifecycle decisions.

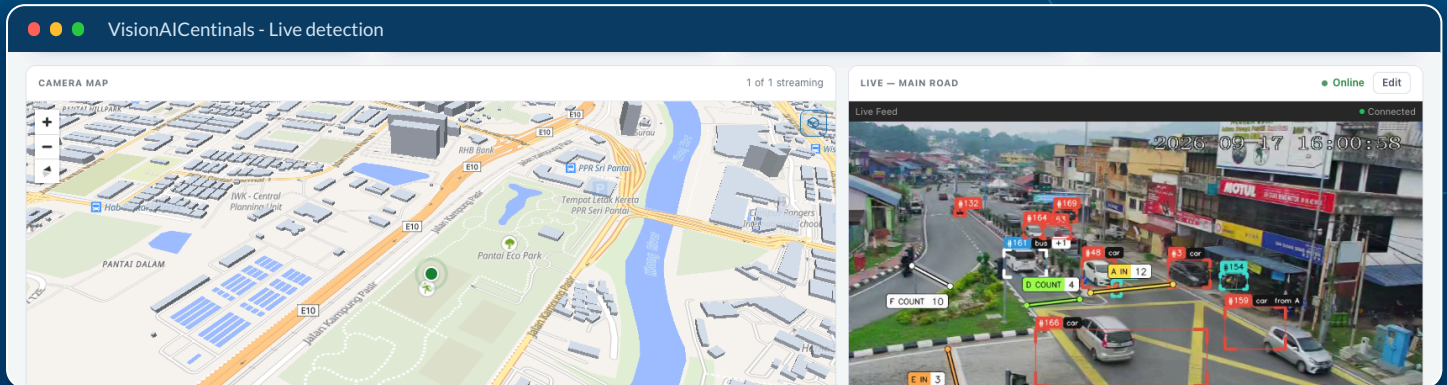

Tell us the challenge. We'll show you what Centinals™ can do.

VisionAICentinals™

AI Video Intelligence & Operational Response

Turn your existing video into intelligence and action.

Your cameras already capture what is happening. VisionAICentinals™ helps you identify what matters, trigger alerts and support faster operational response.

FROM VIDEO TO ACTION

01 DETECT

AI Detection

Identify defined events and situations

02 UNDERSTAND

Operational Intelligence

Turn video activity into useful information

03 ALERT

Real-Time Alerts

Bring attention to what requires action

04 RESPOND

Workflow Integration

Connect detection to notification and response

AI capabilities

Classification

Object detection

Segmentation

Anomaly detection

Facial recognition

USE CASES

Security & Safety

Intrusion · Restricted areas · Safety incidents

Facilities & Operations

Occupancy · Crowd situations · Operational monitoring

Smart City & Public Environments

Situational awareness · Incident detection · Area monitoring

1) CONFIGURABLE

2) INTEGRATION-READY

3) CLOUD OR ON-PREMISE

Make your existing video infrastructure more intelligent — without treating AI as technology for technology's sake.

The Centinals™ Suite

Beyond asset and video intelligence, Centinals™ provides configurable applications for other operational requirements.

HRCentinals™

Workforce & resource management with configurable workflows — without needing a developer for every change.

EventCentinals™

Event, venue and facility operations management.

Digital Identity & Interaction

NFC-enabled identity, access and engagement solutions.

ONE APPROACH

Introduced where they create genuine operational value.

Software + Automation + Analytics + AI

One technology partner from application to infrastructure.

CLL Systems combines enterprise application development with infrastructure, cloud, networking, cybersecurity and managed services — enabling organizations to move from solution concept to implementation and ongoing support with one technology partner.

OUR CAPABILITIES

APPLICATIONS	TECHNOLOGY	DELIVERY
Software Development & Application Engineering	Infrastructure & Cloud	Solution Design
Configuration & Customization	Network & Cybersecurity	Implementation
Integration	AI & Analytics	Managed Services
Automation	Virtualization	NOC / DR / IT Services
